

Mohamed Assaf

Software Developer

Motivated young student with no previous experience with a big passion to progress within the Software Industry I love learning new technologies. I am a quick learner with a catchy mindset and very quick thinking. I have knowledge in two main languages (Python, JavaScript).

PROJECTS

Portfolio (Html/CSS)

Simple Portfolio about myself using pure HTML and CSS you can check the link above my GitHub.

REACT-Expense-Tracker

The expense tracker will have a form where users can input the details of their expenses such as the title, amount spent, and date. The main features are Components, props & dynamic data binding working with user events and states to create an interactive application.

JavaScript (Daily task tracker)

Daily tracker website where you can put tasks to do for the day, and see when you finished the task or if you did it or not. The project is made with DOM manipulations including query selectors and EventListener on click exc...

STW (Share the world) Django

Django/Python website where you can post pictures from the internet of places you visited, And with the package manager Django-all auth there is a Login/Register option to create, login, delete, and edit an account. Also, you can edit or delete the post if the post is yours otherwise you can only add a comment as a viewer.

Django Rest Framework (Company-Employee)

This project is a JSON REST API using Django Rest Framework, it is a Simple CRM system for companies: CRUD API to manage companies, and CRUD API to manage company employees. The project also contains Unit Tests for both the company and its employees.

CERTIFICATES
